

Hang Seng Carnival

The weather was lovely on Sunday December 21, 2003 and a team of us was gathered at Fai Hui Park near Prince Edward to support the Hang Seng Carnival. While Hang Seng has set up various game booths and rides, we were responsible for setting up 6 health screening stations opened for all the staff and clients of Hang Seng that come to the Carnival.

Our booths include free blood pressure tests, Body Mass Index measurement, free Chinese Medicine consultations, spinal screening by our physiotherapists, foot screening by our podiatrist, and vision tests conducted by our optometrist. Our elderly division also participated in the Carnival with their staff helping to distribute our pamphlets and bags to the public.

***A big thanks to all the staff
that have participated
to make this event a success.***
