

AIA HEALTHCARE DAY

The event took place on 31 August 2003 at the Convention Centre. Just like last year, Quality HealthCare was invited by AIA to participate in the event.

About 1,600 people attended that day. Our physiotherapists provided onsite posture screening for them while our podiatrist screened their foot biomechanics using a computerized pressure foot mat. In addition, a computer workstation was set up to allow participants to try out ways to improve their workstations with adjustable keyboard tray, document holder, and so on. A Wheel of Fortune was set up to provide more fun and interaction for the participants, and they all enjoyed our gifts. We were honoured to have Dr. Henry Luke present a health talk on LASIK to the participants. Our gym partner, New York @ hAL, kindly provided two sessions of exercise demonstration for the participants. We received support from two pharmaceutical companies in providing free quick tests on cholesterol and osteoporosis onsite.

The event ended at 6pm and our staff left the Convention Centre with very sore feet and sore throat but also with a lot of satisfaction for a job well done.
